

This is a digital copy of a book that was preserved for generations on library shelves before it was carefully scanned by Google as part of a project to make the world's books discoverable online.

It has survived long enough for the copyright to expire and the book to enter the public domain. A public domain book is one that was never subject to copyright or whose legal copyright term has expired. Whether a book is in the public domain may vary country to country. Public domain books are our gateways to the past, representing a wealth of history, culture and knowledge that's often difficult to discover.

Marks, notations and other marginalia present in the original volume will appear in this file - a reminder of this book's long journey from the publisher to a library and finally to you.

Usage guidelines

Google is proud to partner with libraries to digitize public domain materials and make them widely accessible. Public domain books belong to the public and we are merely their custodians. Nevertheless, this work is expensive, so in order to keep providing this resource, we have taken steps to prevent abuse by commercial parties, including placing technical restrictions on automated querying.

We also ask that you:

- + *Make non-commercial use of the files* We designed Google Book Search for use by individuals, and we request that you use these files for personal, non-commercial purposes.
- + *Refrain from automated querying* Do not send automated queries of any sort to Google's system: If you are conducting research on machine translation, optical character recognition or other areas where access to a large amount of text is helpful, please contact us. We encourage the use of public domain materials for these purposes and may be able to help.
- + *Maintain attribution* The Google "watermark" you see on each file is essential for informing people about this project and helping them find additional materials through Google Book Search. Please do not remove it.
- + *Keep it legal* Whatever your use, remember that you are responsible for ensuring that what you are doing is legal. Do not assume that just because we believe a book is in the public domain for users in the United States, that the work is also in the public domain for users in other countries. Whether a book is still in copyright varies from country to country, and we can't offer guidance on whether any specific use of any specific book is allowed. Please do not assume that a book's appearance in Google Book Search means it can be used in any manner anywhere in the world. Copyright infringement liability can be quite severe.

About Google Book Search

Google's mission is to organize the world's information and to make it universally accessible and useful. Google Book Search helps readers discover the world's books while helping authors and publishers reach new audiences. You can search through the full text of this book on the web at <http://books.google.com/>

Printed for CHARLES KING in *Westminster-Hall*; and sold by
A. BETTESWORTH and C. HITCH in *Paternoster-Row*, and
F. CLAY without *Temple-Bar*. 1732.

The P R E F A C E.

I may be proper to acquaint the Reader with what Improvements have been made in this new Edition. In the Tables of the Patriarchs and ancient Kings, Care has been taken to signify, with the utmost Brevity the relation which every Person bore to his immediate Predecessor. In the Geographical Part, besides the adding of many remarkable Places both in ancient and present Geography, the Memorial Lines, for the general and particular Divisions, have many of them been form'd anew, with particular Regard to the Situation of the respective Kingdoms, Provinces or Countries, into which those Divisions have been made; so that every Line is in some Measure the Epitome of a Map. The Tables of antient Coins, Weights and Measures have been carefully reviewed, and very much augmented; and Decimal Tables subjoyn'd, of great Use for the more speedy and exact Reduction of them. There is likewise added an Index of the Historical, Chronological and Geographical Words; of the Usefulness of which I have given an Account in its proper Place. Besides these there are several Alterations and Additions of less Moment, interspersed throughout the whole; such as either my own Experience or the Judgment of my Friends had suggested to me, in order to render the Design more useful. I shall not trouble the Reader with the Reasons of them, which, if he compares the two Editions, he will very probably find out himself: Nor do I think it necessary to apologize for having made them, since it could not be expected that an Invention of this kind should be so perfect at first, as not to be capable

THE PREFACE.

capable of being considerably improved. And I was the more willing to bestow some Care and Pains upon it, and to give it what Improvement I was able, in Return for the favourable Reception it has met with from the Publick, beyond what was expected by my self or others. An Art of Memory has by many been looked upon as a thing either in it self impracticable, or, at least, in the common Methods of it, useless and trifling. And I was sensible that the following Method would lie under the additional Disadvantage of a whimsical and out of the way Appearance: Besides that the seeming Difficulty of it at first Sight would, I foresaw, deter many from so much as attempting to make themselves Masters of it. Notwithstanding these Discouragements, it has had the good Fortune to give some Satisfaction, and to meet with some Success; and will, I hope, continue to be look'd upon as an useful Help to those who delight in Reading, and would retain what they read with Faithfulness and Accuracy, particularly in such Points wherein their Memories are most likely to fail them.

The Objections which have been made to it from the Difficulty of remembring the Memorial Lines would most effectually be removed by habituating young Minds to them betimes, by the frequent transcribing and Repetition of them. The Technical Words would by this Means become natural and familiar, and of no small Advantage to them in the Course of their future Studies; they would be easily received and long retain'd. But I shall say no more upon this Point, having already touch'd upon it in the Introduction; to which also I refer the Reader for what might further be expected by way of Preface.

THE

T H E

INTRODUCTION.

THERE IS a general Complaint amongst Men of Reading, and to many a Discouragement from it, that they find themselves not able to *Retain* what they read with any Certainty or Exactness. And in no Part of Literature is there greater Room for this Complaint than in *History*: To the studying of which with Pleasure and Improvement, as nothing contributes more, so nothing has been thought more difficult to be *retain'd*, than a distinct and accurate Knowledge of *Chronology* and *Geography*. Upon this Account several Attempts have been made to remedy, in some Measure, the Defects of the Memory, by Chronological and Geographical Tables, Cuts and Maps, and by reducing the principal Parts of History to certain *Epocha's* or *Æra's*, so disposed and contrived, as may be most likely to
affect

affect the Imagination, and make the deeper Impression upon the Mind. Thus Mr. *Hearne* in his *Ductor Historicus*, has reduced the whole Compass of Chronology to thirteen Grand Epocha's, all beginning with the Letter C. Mr. *Prideaux*, in his *Introduction to History*, has made Use of the Number Seven, throughout his whole Book; "not out of Affection (as he tells us) but Experience, as *most easy for the Memory*;" with others of the like Nature, which serve at least to shew that the Memory wants Assistance, and that small Helps are better than none. But of all the Inventions made Use of for this End, none has been found to contribute more to the Assistance of the Memory than that of *Technical Verses*; both as they generally contain a great deal in a little Compass, and also because being once learn'd, they are seldom or never forgot. For the Truth of which I may venture to appeal to the weakest Memories, whether they have not to the last found themselves in Possession of that ever memorable Line:

Barbara Celarent Darii Ferio Baralippton.

Of this Nature is the following Method; the Design of which is not to make the *Memory better*, but *Things more easy to be remember'd*; so that by the Help of it an ordinary, or even a weak Memory, shall be able to retain what the strongest and most extraordinary

The INTRODUCTION. iii

inary Memory could not retain without it. For as he, who first contriv'd to assist the Eye with a Telescope, did not by that pretend to give Sight to the Blind, or make any Alteration in the Eye it self; but only to bring the Objects nearer, that they might be view'd more accurately and distinctly; so neither is it pretended * by this Art to teach those to remember every Thing, who never could remember any Thing; or to make Men in an Instant skilful in Sciences, which before they were utterly unacquainted with, but only to enable them to retain, with *Certainty* and *Exactness*, what they have already a general and competent Knowledge of: that they may not be oblig'd upon every Occasion to have fresh Recourse to their Books or Maps, or be under the tiresome Necessity of reading the same Things again and again, still forgetting them as fast as they read them.

To those who may object, of what Use is it to be thus exact, and content themselves with an imperfect and confused Remembrance of what they read, it might be answer'd, that such as think it of no Use, need not, as I presume they will not, trouble themselves

* Hæc ars tota habet hanc vim non ut totum aliquid, cujus in ingeniis nostris pars nulla sit, pariat & procreet, verum ut ea, quæ sunt orta jam in nobis & procreata, educat atque confirmet. *Cic. de Orat. Lib. II. Edit. C. Steph. p. 182.*

about it; this being design'd for the Benefit of those only, who think it is of Use; and who, even at the Expence of a little Pains, would remember if they could: But besides this, I believe it will be agreed on all Hands, that, to instance in History only, a Man who has an exact Notion of Time and Place, finds incomparably more Pleasure, and makes a speedier Progress in that Study, than he who has not.

I shall here beg Leave to transcribe a Passage from Mr. ADDISON's *Dialogues, upon the Usefulness of Antient Medals*: "There is
 " one Advantage, says *Eugenius*, that seems
 " to me very considerable, which is the great
 " Help to Memory one finds in Medals:
 " For my own Part I am very much embar-
 " rassed in the Names and Ranks of the se-
 " veral *Roman* Emperors, and find it diffi-
 " cult to recollect upon Occasion the diffe-
 " rent Parts of their History; but your
 " Medallists, upon the first naming of an
 " Emperor, will immediately tell you his
 " Age, Family and Life. To remember
 " where he enters in the Succession, they
 " only consider in what Part of the Cabinet
 " he lies, and by running over in their
 " Thoughts such a particular Drawer, will
 " give you an Account of all the remarkable
 " Parts of his Reign."

If this be such a *considerable Advantage* in Medals, I hope it will be allow'd that the following Method is of some Use, since by
 it

it a Man may be enabled to remember when any Emperor from *Julius Cæsar* to *Constantine* began his Reign, and that as readily as you can name him, by the Help of no more than *six Memorial Lines*. The like he may do with the same Ease and Readiness by the Kings of *England*, and so proportionably for any other Part of Sacred or Profane History. For, how impracticable soever it may seem at first View, I have Reason to believe, that any Reader of a common Capacity may, by a regular Proceeding, and ordinary Application, be able readily and exactly to answer *most*, if not *all* the Questions that can be proposed from the following Tables.

The Manner in which I would advise him to proceed (after having premised that he must not be too hasty at first, but make himself * Master of one Thing before he proceeds to another, beginning with such Particulars as he has most Occasion or Inclination to retain) is this. First let him learn to *explain* the several *Memorial Lines*, according to the Method hereafter to be laid down, by consulting the Tables to which they belong. 2. This done; let him by looking upon the Tables learn to
make

* Assumendus Usus paulatim, ut pauca primum complectamur Animo quæ reddi fideliter possint: mox per incrementa tam modica ut onerari se labor ille non sentiat, augenda usu & exercitatione multa continenda est, quæ quidem maxima ex parte memoria constat. *Quintil. Lib. X. Edit. Gibf. Ox. p. 534.*

make out the Lines; and 3. Let him charge his Memory with them, by *frequent Repetition*. By this Means the Words will become *familiar*, how harsh and uncouth soever they may appear at first; and he will find it as easy to know the Diameter, Distance, and Magnitude of any Planet; the particular Time or Age of any remarkable Person or Thing; the Longitude and Latitude of any Place, and the like, as it is to remember their *Names*: The whole Art being in Effect nothing more than this; *To make such a Change in the Ending of the Name of a Place, Person, Planet, Coin, &c.* without altering the Beginning of it, as *shall readily suggest the Thing sought, at the same Time that the Beginning of the Word, being preserved, shall be a leading or prompting Syllable to the Ending of it so changed.*

I would willingly here let the Reader a little more into my Meaning, which he may not otherwise so readily apprehend, lest he should think there is more Difficulty in the Matter than there really is. I would ask him then if he thinks he could remember to call CYRUS, *Cyruts*; or ALEXANDER the Great, *A-léxita*; or JULIUS Cæsar, *Julios Cæsar*; or MAHOMET, *Mahomaudd*; if he can but do this, he has nothing else to do (when he is once Master of the general Key, and knows what Letters of the Alphabet stand for what Figures) in Order to remember, without any Possibility of being mistaken, that the Years in which *Cyrus, Alexander, and Julius Cæsar,*
founded

The INTRODUCTION. vii

founded their respective Monarchies, were as follow :

	<i>Bef. Christ.</i>
CYRUS [<i>Cyrus</i>]	536
ALEXANDER [<i>Alexis</i>]	331
JULIUS Cæsar [<i>Julius</i>]	46

And that the *Mabometan* Æra, or Flight of *Mabomet*, was *A. D.* 622. In like Manner for Geography; does he think he could remember to call *MADRID* *Madroy-t* or *JERUSALEM* *Jeruta-ts*, or *BLENHEIM* *Blenhebau*, or *THESSALY* *Thefsjan*? This is all that is requir'd to remember that the Degree of Latitude of *Madrid* is about 40, and the * Longitude about 3. The Latitude of *Jerusalem* about 31, and the Longitude 36; that *Blenheim* is in *Bavaria*, and that what was the antient *Thefsaly* is the present *Fanna*. Thus the Reader will observe, that all that he has to do, is for one Word to remember another, which only † varies from it a little in the *Termination*. And to make even this easier to be remember'd,

* The Reader is presumed to be so far acquainted with Geography, as to be able to tell which is Eastern and which is Western Longitude, when he is inform'd that the first Meridian is fix'd at *London*.

† In many Words the Variation is very small; as *K. John K. Jann*, *Inachus Inakus*, *Solon Solun*, *HERODOTUS Herodofus*, *PLATO Platok*, *TRAJAN Trajank*, *CLEOPATRA Cleopatla*, *Gordian Imp. Gordin*, the Battle of *MARATHON Marathonz*, *ATTILA Attisla*, *CROESUS Croesuse*, *AUSTIN Austins*, &c. Those which appear more difficult will be full as easy, when familiarized by Use.

viii *The* INTRODUCTION.

ber'd, the *Technical Words* are thrown into the Form of common *Latin Verse*, or at least of something like it. For as there was no Necessity to confine my self to any Rules of *Quantity* or *Position*, I hope I need make no Apology for the Liberty I have taken in having, without Regard to either, and perhaps now and then without so much as a Regard to the just Number of Feet, only placed the Words in such Order as to make them run most easily off the Tongue, and succeed each other in the most natural Manner. But this by the Way for the Reader's Encouragement.

In the mean Time, till he can repeat the *Memorial Lines*, and to those who are not willing to give themselves any Trouble at all in charging their *Memory* with them, the *Tables* themselves will not be without their Use: Of which it may be expected that I should give some Account.

For the Chronology and History I have chiefly consulted * Archbishop *Usher's Annals*, *Marshall's Chronological Tables*, *Petavius's Rationarium*, Mr. *Hearne's Ductor Historicus*, and Bishop *Beverege's Institutiones Chronologicae*. The Succession of the *Assyrian* and *Babylonian Monarchs*, the Kings of *Persia*, *Media*, *Syria*,
Egypt,

* It may be some Satisfaction to the Reader, to know that Mr. *Bedford* (as he tells us in the *Preface* to his *Scripture Chronology*) never differs from Dr. *Prideaux*; and even from the Creation of the World to the Destruction of *Jerusalem*, never above five Years from Archbishop *Usher*, the late Bishop of *Worcester*, or Mr. *Marshall*.

Egypt, &c. is taken from Dr. *Prideaux's* Chronological Tables at the End of his *Connexion*; the Times of the Flourishing of the Fathers, Hereticks, Councils, &c. from Dr. *Cave's Historia Literaria*. The *Roman* Emperors, and the Time of the Writing of the Canonical Books of the New Testament from Mr. *Eachard's* Roman and Ecclesiastical Histories. The Legatin and Provincial Constitutions from the Bishop of *London's* *Codex Juris Ecclesiastici*. The Astronomical Calculations are from Dr. *Derham's* Astro-Theology. I have also added Mr. *Whiston's* from his Theory of the Earth. In the Geographical Part my chief Guide has been Dr. *Wells's* Treatise of ancient and present Geography, whose Maps may be consulted by the Learner. For the Coins, Weights and Measures I have chiefly been obliged to Dr. *Arbutnot's* Book and Tables, not without consulting Bishop *Cumberland*, Dr. *Bernard* and Bishop *Hooper*, and other Writers upon that Subject, of whom I have made what use I thought convenient. If any prefer other Authors, who differ from these, they may easily apply the Art to their favourite Author, by a Change of the Words according to the Method laid down. And indeed when the Reader is perfectly Master of it, he would do well to form Words for his own Use, which perhaps he will sooner remember than those which I had form'd for mine; my Design being rather to give a Specimen of what might be done by it, than a Set of *Compleat* Tables in the respective

b

Sciences.

Sciences. If some think I have been deficient in leaving out what they think worthy of remembering, others perhaps will think I have been too Full. To both these I answer, that I impose no Task upon my Readers, nor desire to prevent their own Improvements; they may add what they please, and pass by what they please. Nor do I think it at all necessary that they should be able to answer *every* Particular in the following Tables; only this I may venture to affirm, that if they once charge their Memory with them, they will find them no Burden, and that 'tis not only practicable, but easie to be done.

'Tis not to be expected that Gentlemen, who have gone through the Course of their Studies, will trouble themselves to begin again anew, and go regularly through the *whole*: But it is submitted to those who have the Education of young Students in the Universities and publick Schools, whether it would not be of some Service towards facilitating the Progress of their Pupils and Scholars in useful Knowledge, to have them early and thoroughly acquainted with this small Treatise. 'Tis the Advice of *Quintilian*, that Boys should be used to repeat, as fast as possible, harsh and crabbed Words and Verses, purposely made difficult, in order to give them a more full and articulate Pronunciation. His Words are these: * *Non alienum fuerit exigere*

* Inst. Orat. Edit. *Gibson*. Oxon, p. 12.

The INTRODUCTION. . . xi

exigere ab his ætatibus, quo sit absolutius os & expressior sermo, ut nomina quædam versusque affectatæ difficultatis, ex pluribus asperrime cœuntibus inter se syllabis catenatos & veluti confragosos, quam citatissime volvant. The frequent Repetition of the following *Memorial Lines* would certainly answer *this* End, and, at the same Time a *much better*; and if I might also recommend, as he does, the *Writing* of them too, in order to make the deeper Impression, it would doubtless have a good Effect, and Boys would be treasuring up Learning even before they were aware of it. † *Illud non pœnitebit curasse cum Scribere nomina puer (quemadmodum moris est) cœperit, ne hanc operam in vocabulis vulgaribus & forte occurrentibus perdat. Protinus enim potest Interpretationem linguæ secretioris quam Græci γλώσσας vocant, dum aliud agitur, ediscere, & inter prima Elementa consequi rem postea proprium tempus desideraturam.* It may be sufficient to have just hinted these Things to those whose more immediate Province it is, and who are best qualified to judge what Methods may most effectually contribute to the Improvement of those under their Care.

From the Account I have given of it, the Reader will observe, that the Method here proposed is perfectly different from that of

The INTRODUCTION. xiii

Repository of Ideas, a large House or the like, divided into several Apartments, in each of which you are to place in Order a symbolical Representation of the Things which you would remember) they have given us a very full and particular Account, as also of the Occasion which first gave Rise to it. What Improvements have been made of this Method by some modern Authors, or in what Manner, or with what Success others have set up to teach privately the Art of Memory, I am altogether ignorant. Having found my own Method sufficient for my self, I had no Inclination to look after any other. What Use it may be of to the Publick must be left to Experience. The Novelty of it may perhaps recommend it to the Inquisitive and Curious; and I desire nothing more than that into whose Hands soever it may fall, he would not be prejudiced against it upon the Account of its *seeming Difficulty*, before he has made *Trial* of it, being inclined to think that to any one, who is at all acquainted with it, it will be found to be so far from being *really* difficult, that nothing can be more easy, or more obvious. The Representation of Numbers by Letters of the Alphabet hath been a Thing in Practice, more or less, almost in every Language. The only Thing wanting was to make that Representation further useful, by substituting Vowels as well as Consonants for the numerical Figures, in such Manner and Proportion, that any Number

ber might be form'd into a Word capable of being articulately pronounced, and consequently more perfectly remember'd. Amongst the *Jews* indeed, of whose Alphabet the Vowels are no Part, it was a Practice, not only to abbreviate Sentences and Names of many Words, by putting together the Initial Letters of those Words, and making out of them an * *Artificial Word* to express the whole; but also to make use of *Natural Words*, to represent Numbers, when they could meet with such as happen'd to answer the Number which they wanted to express. We have several Pieces of Ingenuity of this Kind in the Frontispieces of their Bibles, where they give us the *Year* of the Edition in some Word or Sentence of Scripture, the Letters of which according to their numerical Value make up the Date. † I have subjoin'd some of them for

* As *Rambam* for R-abbi M-ofes B-en M-aimon; *Rabag* for R-abbi L-evi B-en G-erson; *Maccabees*, from the Abbreviation of the Words in the Standard of *Judas Maccabæus*, M-i C-amoka B-aclim J-ehovah, i. e. *who is like unto thee amongst the Gods O Lord*. Vide Prideaux Connest. Part II: Book 3. Of this Nature is what the Reader will meet with in the Beginning of the Geographical Part of this Method, pag. 56, &c.

† Sed non omittendum est, Judæos in librorum præcipue titulis, ad annum quo impressi sunt indigitandum, literas numerales alio atque quem tradimus ordine Collocare. E-
 mvero vocem unam vel plures, easque vel seorsim, vel in Sententia aliqua Biblica comprehensas excogitant, quarum literæ utut dispositæ numerum propositum valeant. Ex gr.
 In

for the Entertainment of the Learned Reader from Bishop Beverege's *Arithmetice Chronologica*. And indeed I am not certain whether I owe not to Observations of this Kind the first Hint of this Method, which I have carried so far, and which doubtless, like all other Inventions, is still capable of further Improvements.

What is added of the Miscellany Kind, is a small Part of what I had drawn up for my own Use, and shews how easily this Art may be

In Bibliis sacris a Josepho Athia Amstelodami editis, tria occurrunt frontispicia, unum ad Pentateuchum, ad Prophetas alterum, tertium ad Hagiographa. Primum impressum dicitur שנה לשני עש ספר מדור לפק Anno computi minoris *lingua mea est stylus scribæ prompti. Ps. xlv.* Ubi voces עש ספר ut virgulis superne notatæ annum indignant quo Pentateuchus impressus fuit. Quotus autem fuit annus computi Judaici minoris statim inveniatur, si omnes vocum istarum literæ una cum numerico earum valore ita disponantur $\gamma \ 70 \ ט \ 9 \ ס \ 60 \ פ \ 80 \ ר \ 200.$ 419. Ergo annus erat 419 juxta computum Judæorum minorem, de quo videtis Chronologicas nostras Institutiones. Sic & Prophetæ impressi dicuntur בשנה משא גי חזק לפק Anno *O-nus vallis visonis* computi minoris, *Is. xxii.* Ubi literæ חזק משא גי חזק valent 420. Frontispiciū autem ad כתובים sive Hagiographa impressum est Anno כתובים באזבע *scripta Digito Dei*, ubi primæ duæ literæ vocis חזק annum eundem 420 significant. Nam ח valet 400, & ב 20. Hunc etiam in modum Talmud Basilicæ impressum dicitur שנה פרות שלח לעמו Anno *redemptionem misit populo suo. Ps. cxi.* Ubi literæ vocis שלח valent 338. Denique Seder Tephilloth Hispanienſis sive Judæorum Hispanorum liturgia ingeniosissime impressa dicitur שנה הוצא Hoc Anno, *i. e.* Anno 413, quem literæ הוצא indignant. *Lib. I. c. 6.*

be applied to almost every Part of Learning. If upon the whole this Attempt shall be found to contribute to the more speedy Attainment of useful Knowledge, and to give Men of Reading, instead of an imperfect and confused Remembrance of what they read, a satisfactory Certainty and Exactness, as I cannot think the little Time I have spent upon it ill bestow'd in Respect of my own Improvement, so I shall be glad that it proves of as much Benefit to others as I have found it to my self.

Memoria Technica :
 O R, A
 NEW METHOD
 O F
 Artificial Memory.

S E C T. I.

THE principal Part of this Method is briefly this; To remember any thing in History, Chronology, Geography, &c. a Word is form'd, the Beginning whereof being the first Syllable or Syllables of the Thing sought, does, by frequent Repetition, of Course draw after it the latter Part, which is so contriv'd as to
 B give

2 MEMORIA TECHNICA.

give the Answer. Thus, in History, the Deluge happened in the Year before *Christ* two Thousand three Hundred forty eight ; this is signified by the Word *Deletok* : *Del* standing for *DELuge*, and *etok* for 2348. In Astronomy, the Diameter of the Sun (*Solis* Diameter). is eight Hundred twenty two Thousand one Hundred and forty eight *English* Miles ; this is signified by *Soldi-ked-áfei*, *Soldi* standing for the Diameter of the Sun, *ked-áfei*, for 822,148 ; and so of the rest, as will be shewn more fully in the proper Place. How these Words come to signify these Things, or contribute to the Remembling them is now to be shewn.

The first Thing to be done is to learn exactly the following Series of Vowels and Consonants, which are to represent the numerical Figures, so as to be able, at Pleasure, to form a *Technical Word*, which shall stand for any Number, or to resolve a Word already form'd into the Number which it stands for.

<i>a</i>	<i>e</i>	<i>i</i>	<i>o</i>	<i>u</i>	<i>au</i>	<i>oi</i>	<i>ei</i>	<i>ou</i>	<i>y</i>
1	2	3	4	5	6	7	8	9	0
<i>b</i>	<i>d</i>	<i>t</i>	<i>f</i>	<i>l</i>	<i>s</i>	<i>p</i>	<i>k</i>	<i>n</i>	<i>z</i>

Here *a* and *b* stand for 1, *e* and *d* for 2, *i* and *t* for 3, and so on.

These Letters are assign'd Arbitrarily to the respective Figures, and may very easily be remember'd. The first five Vowels in order naturally represent 1, 2, 3, 4, 5. The Diphthong *au*, being composed of *a* 1 and *u* 5 stands for 6 ; *oi* for 7, being composed of *o* 4 and *i* 3 ; *ou* for 9, being composed of *o* 4 and *u* 5. The Diphthong *ei* will easily be remember'd for eight, being the Initials of the Word. In like Manner for the *Consonants*, where the Initials could conveniently be retain'd, they are made use of to signify the Number, as *t* for three, *f* for four,

MEMORIA TECHNICA. 3

s for six, and *n* for nine. The rest were assign'd without any particular Reason, unless that possibly *p* may be more easily remembred for 7 or Septem, *k* for 8 or *okta*, *d* for 2 or duo, *b* for 1, as being the first Consonant, and *l* for 5, being the Roman Letter for 50, than any others that could have been put in their Places.

The Reasons here given, as trifling as they are, may contribute to make the Series more readily remembred; and if there was no Reason at all assign'd, I believe it will be granted that the Representation of nine or ten numerical Figures by so many Letters of the Alphabet, can be no great Burthen to the Memory.

The Series therefore being perfectly learn'd, let the Reader proceed to exercise himself in the Formation and Resolution of Words in this manner.

10	325	381	1921	1491	1012	536	7967
<i>az</i>	<i>tel</i>	<i>teib</i>	<i>aneb</i>	<i>afna</i>	<i>hybe</i>	<i>uts</i>	<i>pousai</i>

431	553	680	&c.
<i>fib</i>	<i>lut</i>	<i>seiz</i>	&c.

And as in Numeration of larger Sums, 'tis usual to point the Figures at their proper Periods of Thousands, Millions, Billions, &c. for the more easy Reading of them, as 172.102,795 one Hundred seventy two Millions, one Hundred two Thousand, seven Hundred ninety five; so, in forming a Word for a Number consisting of many Figures, the Syllables may be so conveniently divided, as exactly to answer the End of Pointing. Thus in the Instance before us, which is the Diameter of the Orbit of the Earth in *English* Miles: The *Technical* Word is *Dorbterboid-âxe-poul*; the Beginning of the Word *Dorbter*, standing for the Diameter of the Orbit of the

2 MEMORIA TECHNICA,

Earth, (Diameter ORBITÆ TERRÆ) and the remaining Part of it *void-axe-poul* for the Number 172,102,795.

N. B. Always remember that the Diphthongs are to be consider'd but as *one Letter*, or rather, as representing only *one Figure*. Note also, that *y* is to be pronounced as *w*, for the more easily distinguishing it from *i*, as *fyd* = 602, pronounce *fuwd*, *tyy* = 307 pronounce *tuwip*.

The Reader will observe that the same Date or Number may be signified by different Words, according as Vowels or Consonants are made Choice of, to represent the Figures, or to begin the Words with, as

325 *tel*, or *idu*, 154 *baf*, or *blo*, or *ah*, or *alo*.
93.451 *ni-alo*, or *out-sub*, or *ni-fla*, or *out-alb*, &c.

This Variety gives great Room for Choice, in the Formation of Words, of such Terminations as by their *Uncommonness* are most likely to be remembered, or by any *accidental Relation* or *Allusion* they may have to the Thing sought. Thus the Year of the World in which *Aeneas* is supposed to have settled in *Italy* is 2824; but as this may be expressed either by *ekef* or *deidq*, I chuse rather to joyn *deida* to *Aeneas*, and make the Technical Word *Aenedeida* than *Aenekef*, for a Reason which I think is obvious. Thus King *John* began his Reign A. D. 199. (one Thousand being understood to be added, as I shall shew hereafter;) but as this may be express'd by *anou*, or *boun*, or *ann*, I make Choice of the last, for then 'tis but calling him *Jann* instead of *John*, and you have the Time almost in his Name. Thus *Inachus* King of *Argos* began his Reign in the Year before *Christ* 1856; with a very small Variation in the Spelling, 'tis his Name *Inakus* †. But this by the Way.

To

* More Instances of this kind, see in the *Introduction*, p. ix.

MEMORIA TECHNICA. 5

To go on with our Art; 'tis further to be observ'd, that *z* and *y* being made use of to represent the Cypher, where many Cyphers meet together, as in 1000, 1000000, &c. instead of a Repetition of *azyzyzy*, which could neither be easily pronounced nor remember'd, *g* stands for Hundred, *th* for Thousand, and *m* for Million. Thus *ag* will be 100, *ig* 300, *oug* 900, &c. *ath* 1000, *eth* 4000, *otho* or *ethf* 4004, *peg* 7200, *dig* 2300, *lath* 51000, *am* 1000000, *axmuth* 10.004.000, *sumus* 65.000.056, *loum* 59.000.000, &c. The solid Content of the Earth (TERRÆ MAGNITUDO) is two Hundred sixty four Thousand, eight Hundred fifty six Millions of Cubick Miles; this is express'd by the Word Ter-magnit-*éso-kloum*; Termagnit standing for Terræ Magnitudo; *éso-kloum* for 264,856.000,000 the Number of Cubick Miles.

It will be sometimes also of use to be able to set down a Fraction, which may be done in the following Manner: Let *r* be the Separatrix between the Numerator and the Denominator, the first coming *before*, the other *after* it; as *iro* $\frac{1}{4}$ *urp* $\frac{7}{8}$ *pourag* $\frac{72}{100}$ or ,79 *north* $\frac{184}{100}$ or ,094 &c. Where the Numerator is 1, or Unit, it need not be expressed, but begin the Fraction with *r*, as $\frac{1}{3}$ *re*, $\frac{1}{3}$ *ri*, $\frac{1}{4}$ *ro*, &c. So in Decimals, ,01 or $\frac{1}{100}$, *rag* ,001 or $\frac{1}{1000}$ *rath*.

Thus I have given the Reader a general View of what is the principal Part of this Method. I shall now proceed to shew how I have applied it to History, Geography, Astronomy, and other Parts of useful Learning; and having explain'd a Line or two in each, leave the rest to his own Industry and Sagacity.

6 MEMORIA TECHNICA.

S E C T. II.

The Application of this Art to Chronology and History.

THE Ages of the World before our Saviour's Time are by Chronologers generally divided into Six: The First from the Creation to the Deluge; the Second from the Deluge to the Call of Abraham, &c. according to the following Periods:

	Before Christ.
1. The Creation of the World	4004
2. The universal DELuge	2348
3. The Call of Abraham	1921
4. EXodus, or the Departure of the <i>Israelites</i> } from <i>Egypt</i>	1491
5. The Foundation of <i>Solomon's Temple</i>	1012
6. CYRUS, or the End of the Captivity	536
The Birth of <i>Christ</i> .	

All this is express'd in one Line belonging to TAB. I. as follows:

Crthf Deletok Abanab Exafna Tembybe Cyruts.

Cr denotes the Creation, *othf* 4004, Del the Deluge, Ab the Calling of Abraham, Ex Exodus, Tem the Temple, and Cyr Cyrus. The Technical Endings of each represent the respective Year according to the Rules already laid down.

I shall explain two Lines more.

Nicfilcon-áritel, Codathé-mateib, Ephcethe-nésfíb.
Chállemar-eudíola, Covijúst-Olut, C-ágcopo-monfeiz.

These

These two Lines are a short History of the first Six General Councils ; and every Syllable has its distinct Signification. The *first* represents the Place where it was held ; the *second* shews who was Pope at that Time ; the *third* under what Emperor ; the *fourth* against what Heretick ; the *fifth*, in what Year of our Lord. Thus the first Word is Nicilcon *àritel*. Nic denotes the Council of Nice, il Pope SILvester, con the Emperor Constantine, ari the Heretick ARIUS, *tel* the Year 325. The second Word is Codathé-mateib ; Co denotes the Council of CONStantinople, da Pope DAMasus, *the* the Emperor THEodofius, ma the MACedonians, *teib* 381. The third is Ephcethe-nesfib ; Eph the Council of EPHesus, ce Pope CElestine, *the* the Emperor * THEodofius, nes the NESTorians, *fib* the Year 431. The fourth is Châllemar-eudíola ; Chal the Council of CHALcedon, le Pope LEO, mar the Emperor MARcian, eudi the Errors of EUTyches and DIOScorus, *ola* the Year 451. The fifth is Covijúst-Olut ; Co stands for CONStantinople, vi Pope VIGilius, just the Emperor JUSTinian, O the Errors of ORigen, *lut* the Year 553. The sixth is C-ágcopo-monfeiz ; C stands again for Constantinople, ag for Pope AGatho, copo the Emperor CONStantine POGonatus, mon the MONothelites, *feiz* the Year 680.

By this Specimen the Reader will be able to judge what he is to expect from the following Essay, and what it will cost him to make himself Master of it. I would by no Means have him discouraged at the Difficulty which, at first View, he may apprehend there is, in charging his Memory with so many harsh and barbarous Lines. For tho' they may appear to be so to a Person unacquainted with them, and as such difficult to be remember'd ; yet when frequent Repetition has made them familiar,

what

* Theodofius Junior.

8 MEMORIA TECHNICA.

what can be more easy than to supply the remaining Part of a Word, which you are prompted with the Beginning of? As for Instance, to complete Cr--- Del--- Ab--- Ex--- Tem--- Cyr--- with their Technical Endings, and make them up into the following Line already explain'd,

Cröthf Déletok Abaneb Exáfna Témbybe Cyruts.

I have only further to desire the Reader to take Notice, that for his greater Ease, that Part of the Memorial Words, which represents the Numbers or Dates, is distinguished by *Italick* Characters; that Part, which is *Roman*, answers to the small Capitals in the Tables.

TABLE I.

General Epochas and Æras Ecclesiastical and Civil.

	Bef. Christ.
The CREATION of the World [<i>Cröthf</i>]	4004
The universal DELUGE [<i>Déletok</i>]	2348
The Call of ABRAHAM [<i>Abaneb</i>]	1921

16 MEMORIA TECHNICA.

N. B. After *Canute* inclusive, One Thousand is to be added to each : It was thought unnecessary to express it, it being a Thing in which it is impossible that any one should mistake.

If it be desired to remember in what Month, and Day of the Month each King began his Reign, it may be done by the following Lines :

Wil-tbó-sou-fat Steph-de Jam-chef-fau Ri-ls-jeb-ed
El-nap.
Hen-gé-tel-an sez-chex gib-ged-ped Geor-ga-jab
An-chei.
Car-chep-riz Ma-ls Jo-p Ed-nás-loi rél-cho pou-rekque.

EXPLANATION.

The *Italick* Letters represent the Day of the Month ; the Letter immediately preceding represents the Month it self, r standing for January, f for February, ch for March, p for April, m for May, j for June, l for July, g for August, s for September, t for October, n for November, and d for December.

Thus Steph-de, Steph King Stephen, de Dec. 2. El-nap El Elizabeth, nap Nov. 17. In Words of three or more Syllables, the first Syllable stands for all the Kings of the same Name, and the following Syllables in order answer to the first, second, third, &c. of that Name. So Jam-chef-fau ; Jam denotes James I. & II. chef (viz. March 24.) belongs to James I. and fau (viz. Feb. 6.) to James II. So Ri-ls-jeb-ed ; Ri denotes all the Richards, ls (viz. July 6.) belongs to Richard I. jeb (viz. June 21.) to Richard II. and ed (viz. 22. of the same Month) to Richard III.

If this be thought either too difficult, or too minute, the Reader may pass it over.

TABLE

TABLE VI.

Chronological Miscellanies since the Conquest.

	Ast. Christ.
<i>Jerusalem</i> regained from the <i>Turks</i> and <i>Godfrey of BULLOÏNE</i> made King of it [<i>Godbulnau</i>]	1099

The Reader is desired to take Notice, that in this and the following Tables, (where it could be done consistently with the intended Brevity) the Relation which every Person bore to him who immediately goes before, is signified by a single Letter; s standing for Son or Sister, b for Brother, n for Nephew or Niece, u for Uncle, g for Grandson, m for Mother. So the s after Enos shews that he was the Son of Seth, and so on.

SARDANAPALUS in whom ended the <i>Assyrian</i> } Monarchy [<i>Sardanap</i>]	747

F

ÆGIALEUS.

N. B. After the Death of *Alexander* there arose great Confusions among his Followers about the Succession, each seizing what he could for himself, till by leaguings and making War against each other, they were, after some Years, all destroy'd to four. These were *Cassander*, *Lysimachus*, *Ptolemy* and *Seleucus*, and they divided the whole Empire between them.

Cassander had Macedon and Greece.

Lysimachus had THRACE and those Parts of Asia which lay upon the Hellespont and the Bosphorus.

Ptolemy had Ægypt, Libya, Arabia, Palestine, and Coele-Syria.

SELEUCUS all the rest of Asia, &c.

Cass-magre Lys-thraehobos Ptol-elibapally Seleuc-as.

XXXIX. DIOCLESIAN and MAXIMIAN [Di- maxdeif]	284
XL. CONSTANTIUS CHLORUS and GA- LERIUS [Chlo-galtys]	303
XLI. CONSTANTINE the Great [Constys]	306

* GALLUS. Between *Gallus* and *Valerian*, some Writers rank *Æmilian* among the Number of Emperors, but because he was never established in the Empire, nor his Title generally acknowledged, others more justly place him only among the Usurpers.

† FLAVIUS CLAUDIUS. Upon the Death of *Claudius*, *Aurelian* was unanimously chosen by the Army; and at the same Time *Quintillus*, Brother to *Claudius*, was proclaimed Emperor in *Italy*, and his Election allow'd by the Senate; but finding himself unable to support his Cause against *Aurelian*, he dispatch'd himself, by causing his Veins to be opened, after a short Reign only of 17 Days before he was rightly settled in his Empire; for which Reason he is here omitted.

|| CONSTANTINE was saluted Emperor of the *West* upon the Death of his Father *Constantius Chlorus*; but was not sole Monarch till the Defeat and Death of LICINIUS, An. Dom. 323. [Licinitet] He remov'd the Imperial Seat to *Byzantium* in the Year 330. [Byzantiz.]

It was not agreeable with the Author's Design to give a *complete* Table of all the *Eastern* and *Western* Emperors. The Succession is carried down to the Sixth Century; and after that, only a few are added of such as were most remarkable: To which it may not be improper to subjoyn those Persons who were famous for wasting and ravaging the *Roman* Empire.

56 MEMORIA TECHNICA.

When the Reader is become well acquainted with the *General Divisions*, he may then go on to charge his Memory with the chief Cities, and most remarkable Places of every Country; their Longitude and Latitude; the Correspondence of antient and present Geography; the Geography of the Old and New Testament; the Proportions of the Kingdoms of *Europe to Great Britain*; the Situation of the most noted Islands; with other instructive and entertaining Particulars in Geography: All which he will find himself able to remember with greater Ease than he can possibly imagine, till he is acquainted with the *Memorial Lines*, contriv'd for that Purpose.

TABLE I.

The General Divisions of EUROPE, ASIA, AFRICK and AMERICA.

I. EUROPE is divided into,

1. *Northern*; Containing NORway, S-weden, MOScovy; D-enmark:
2. *Middle*; Containing Netherlands, Germany, POLand, little T-artary; FRANCE, SWITZERland, HUNGary, TRANsilvania, MOLDavia, VALachia.
3. *Southern*; Containing Spain with *Portugal*, Italy, TURky.

Eur = No-S-Mo D; Né-Ge-Po-IT Fran-Switz
Hun-Tran-Mo-Va Sp -It -Turk.

II. ASIA is divided into,

1. *Northern*; Containing Great Tartary, GEOR-gia.
2. *Middle*;

G E O G R A P H I C A. 57

2. *Middle* ; Containing Turkey in Asia, Persia, Empire of the MOgul, CHINA.

3. *Southern* ; Containing ARABIA, East INDIES.

AS = Ta-Geo ; Tur-Pé-Mo-Chin ; Arab -Ind —

III. AFRICK is divided into,

1. *Northern* ; Containing Barbary, BILdulgerid, E-gypt.

2. *Middle* ; Containing ZAara, Negroland, GUI-nea, N-ubia.

3. *Southern* ; Containing CONGO, ABissinia, Coast of ABEX, Coast of CAfferia, MONomotopa, ZANGuebar, Coast of Ajan.

AF = BāBil-E ; ZāNeGui-N ; Con-Abíff-Abe
Caf-Mono-Zangu-Aj.

IV. AMERICA is divided into,

1. *Northern* ; Containing New WALES, New BRITAIN, LOUISIANA, CANADA or New FRANCE, New GRANADA, MEXICO, FLORIDA, New ENGLAND containing these seven Provinces, (CAROLINA, VIRGINIA, MARYLAND, PENNSYLVANIA, NEW YORK, NEW JARSEY, New ENGLAND properly so call'd,) lying from South West to North East.

2. *Southern* ; Containing Terra FIRMA, PERU, Country of the AMAZONS, BRASIL, CHILI, PARAGUAY, MAGELLANICA.

N-AM = Wal -Brit Lóvi-Can GranMex-Flor (Cár-Vi-Ma P-YorJ Eng.

— S-AM = Fírm Per-Amáz-Bra Chi-ParMag.

TABLE II.
The particular Divisions of Northern
EUROPE.

I. NORWAY is divided into five Parts or Governments, *viz.*

WARDhus (containing **F-inmark** and Norwegian **LAPland**;) **Drontheim**, **BERgen**, **Aggerhus**, † **B-a-hus**.

II. SWEDELAND is divided into seven general Parts, *viz.*

Swedish **LAPland** with **B-othnia** intermingled, **SWEDEN** Proper, **F-inland**, **INGRIA**, **Gothland**, **SCo-nen**, **Livonia**.

III. DENMARK contains,

The Peninsula of **Jutland**, **ZEeland**, and the lesser Isles.

IV. MUSCOVY contains many Provinces; the most considerable of which are,

Northern; **Moscovian LAPland**, **S-amoiedes**, **Ob-dora**, **CONDora**, **Siberia**, **Dwina**, **K-argapolia**.

Southern; **WELiki**, **PLESkow**, **MOscow**, **VO-lodimir**, **MORDUA** Tartars, **CZERMISSi** Tartars, **Casan**.

Vo-Mordua-Czerm-Cas.

TABLE

† Some make *Babus* a Part of *Swedeland*.

TABLE III.

The Particular Divisions of Middle EUROPE.

I. The NETHERLANDS, or *Low-Countries*, are generally distinguished into the *United* or *Dutch Netherlands* lying to the *North*, frequently call'd *Holland*, and the *Spanish Netherlands* to the *South*, frequently call'd *Flanders*, from the most remarkable Province in each.

The *United Netherlands* are usually divided into these Seven Provinces, viz. FRISLAND, GRONINGEN, OVERYSEL, HOLLAND, UTRECHT, GELDERLAND with ZUTPHEN, ZEELAND.

The *Spanish Netherlands* are usually divided into these Ten Provinces, viz. FLANDERS, BRABANT, MARQUISATE of the Empire within *Brabant*, SEIGNORY of MALINES within *Brabant*, PART of GELDERLAND, LIMBURG, ARTOIS, HANAUT, NAMUR, LUXEMBURG.

HOLL = Fris-GrOv H-U-Ge-Zu Z; Fla-B (Mar-Ma) GLim Art-Ha-Na-Luxem.

II. GERMANY is divided into Nine Circles;

Three *Northern*; Circle of WESTPHALIA, Circle of lower SAXONY, Circle of upper SAXONY.

Three *Middle*; Circle of lower RHINE, Circle of upper RHINE, Circle of FRANCONIA.

Three *Southern*; Circle of SUABIA, Circle of BAVARIA, Circle of AUSTRIA.

To which may be added, the Kingdom of BOHEMIA, distinguish'd into four general Parts, viz. LUSATIA, SILEZIA, BOHEMIA proper, MORAVIA.

GERM = We-Sal-up; Rhi-l-u-Fran; Sua-Bav-Aus.

BOHE = Lusa-Si Bo-Mor.

60 MEMORIA TECHNICA.

III. *POLAND* is distinguished into two general Parts; the Duchy of *Lithuania*, and the Kingdom of *Poland* properly so call'd.

The Duchy of *Lithuania* contains the Duchy of Curland, Samogitia, *LITHUANIA* proper.

The Kingdom of *Poland* contains Prussia, *PO-LACHIA*, *MAZOVIA*, *Poland magna*, *Poland parva*, little Russia, *VOLHINIA*, *PODOLIA*.

POL = CuSa-Lith Pru-Polach Maz Polmapa Rus-VolhiPodol.

IV. *FRANCE* is divided into Twelve Governments:

Four *Northern*; P-icardy, Normandy, I-sle of *France*, *CHAMPAGNE*.

Four *Middle*; *BRETAGNE*, O-rleanois, *BOURGOGNE*, L-ionnois.

Four *Southern*; *Guienne* with *Gascony*, *LANGUEDOC*, *DAUPHINY*, P-rovence.

To which may be added the other Countries comprehended within the Compass of *Old Gaul*, viz.

LORRAIN, East of *Champagne*.

SAVOY, East of *Burgundy* and *Dauphiny*.

SWITZERLAND East of *Franche Compté*.

FRANCHE COMPTÉ, East of *Burgundy*.

FRA = P Nor-I-Cham; Brét-O-Bou L; Gui-La-DaP. LorCb SavBuDa SwiC CoB.

T A B L E IV.

The Particular Divisions of Southern EUROPE.

I. *SPAIN* (excluding *Portugal*) may be divided into two general Parts:

Northern;

G E O G R A P H I C A. 61

Northern; Containing Eight Provinces, viz. GAL-
licia, A-sturia, Biscay, N-avarre, ARAGON, CATA-
lonia, LEON, Castile *vetus*.

Southern; Containing Five Provinces, viz. Castile
nova, VALENCIA, ANDALUSIA, MURCIA, G-ranada.

SPA = Gál-A-Bisc-N-Ara-Cat Le-Casvet Casno-
Val And-MurG.

II. *ITALY* may be distinguished into

Northern, or Lombardy; Containing Piedmont,
MONTferrat, MILAN, Republick of G-enoa, Re-
publick of VENICE, MANTua, PARma, Mirandula,
MODena.

Southern; Republick of Lucca, Duchy of Tuf-
cany, the PAPacy, or States of the Church, Kingdom
of NAPles.

IT = Lom (= Pi-Mont-MilG VenManPa-MiMód)
Lu-Tu Pap-Nap.

III. *TURKY* in EUROPE may be distin-
guish'd into,

Northern; Containing Bessarabia, Croatia, D-al-
matia, BOsnia, Servia, BULGaria.

Southern; Containing ALBania, MACedonia, Ro-
mania, CANina, Janna, LIVADIA, MOREa.

TURK = Bess CroD Bó-Se-Bul; Alb-Mac-Rom
Can-Ja LivadMor.

The Memorial Lines for all EUROPE.

TABLE IX.

LATITUDE and LONGITUDE of the
 most remarkable Places.

To the Beginning of the Name of the Place is
 added a *Technical Ending*, consisting of three or four
 Letters

* Part of *Canada*.

Letters, the two first whereof denote the Latitude ; the other the Longitude : Thus,

Stocklou-ak, i. e. Stockholm in the 59th Degree of Latitude, and 18 of Longitude ; *lou* standing for 59, according to the general Key, and *ak* for 18. But note here, that you are not to suppose this is the *exact* Longitude and Latitude of the Place, because here are no Minutes taken notice of, which would perhaps be a Nicety not worth remembring : But that the Latitude is between 59 and 60, and the Longitude between 18 and 19. * And that you may be sure not to be mistaken above a Quarter of a Degree, 'tis farther to be observ'd, that if of the two Letters, which signifie the Longitude and Latitude, the first is a *Consonant*, as in *lou*, in that Case, tho' the Longitude, &c. is between 59 and 60, yet it is nearer to 60 than it is to 59, and consequently 59 Degrees 30 Minutes at least, if not more. If the first Letter is a *Vowel*, as in *ak*, tho' it is between 18 and 19, yet 'tis nearer to the *lesser* Number, and consequently 18 Degrees and *under* a half: as the true Longitude of *Stockholm* is 18 Deg. 22 Min. the true Latitude 59 Deg. 30 Min.

TABLE X.

*Distance of Chief Cities, &c. from London,
in English Miles.*

To the Beginning of the Name of the Place there are two or three Letters added, which are to be supplied with a Cypher at the End; it being thought sufficient to give a round Number, instead of being too exact, especially in a Matter wherein the best Geographers themselves are not agreed; as,

[*Madreis*] MADRID distant from *London* 86 *fe.* 860 Miles. COPENHAGEN [*Cop/a*] distant about 61, *fe.* 610. GENEVA [*Genevos*] distant *as* 46, *fe.* 460 Miles; and so of the rest, only PARIS [*Pardel*] 225.

Note. That the Computations are made at the Rate of $69\frac{1}{2}$ Miles to a Degree, which is certainly nearest the Truth, and are therefore about one part in seven more than in Mr. *Templeman's* Tables, who computes by Geometrical Miles, or 60 to a Degree.

Distances from London.

II. Antient *GREECE* was usually divided into five general Parts, viz. *Macedonia*, *Thessalia*, *E-*
FIRUS,

* Lying in order along the *Alps*.

† Lying in Order on the *Mare Inferum*.

‡ Lying in Order on the *Mare Superum*.

¶ In the Inland Parts.

PIRUS, HELLAS or *Græcia* properly so call'd, and PELOPONNESUS.

GRÆ=MáTh Epir-HelPel ———

1. PELOPONNESUS was divided into six Parts or Regions, *viz.* * ACHAIA, ELIS, MESSENIA, LACONIA, ARGIA or ARGOLIS, † ARCADIA.

—— PELOP=Ach-Eli-Méss-Lac-Ar-Arcad.

2. EPIRUS contain'd these People and Countries; *viz.* CHAONES, DRYOPES, THESPROTII, CASSIOPÆI, AMPHILOCHI, ALMENE, MOLOSSI, ACARNANIA.

EP=Chao-Dry Thesprot-Cass-Amphiloc Al-Mol Acarnan.

3. *Hellas*, or GRAECIA PROPRIA (call'd also *Achaia*) was divided into eight Parts, *viz.* DORIS, LOCRIIS, EPICNEMIDIA, ÆTOLIA, LOCRIIS OZOLÆA, PHOCIS, BOEOTIA, MEGARIS, ATTICA.

GRÆ-PROPRI=Dó-Loctep Æto-Loctéz-pho-bœ meg-att.

4. THESSALIA contain'd these several Parts, *viz.* PELASGIOTIS, ESTIOTIS, THESSALIOTIS, PTHIOTIS, MAGNESIA.

THESS=PelasEstThéss-Pthi-M ———

5. Some of the more remarkable People and Countries of MACEDONIA, were TAULANTII, PÆONES, MYGDONIA, ÆMATHIA, AMPHAXITIS, PIERIA.

—— MACE=Taul-Pæo-mygd-æmath-AmphPi.

* Lying in Order on the *Ionian*, *Ægean* and *Cretan* Sea.

† In the Inland.

Asia *m-inor* comprehended Asia *p-ropria*, Bithynia, Pontus, Galatia, * CAPPADOCIA; — LYCIA, PAMPHYLIA, CILICIA.

Asm = Asp-Bith-Pó-Ga-Capp. Lyci-pamphy-cil —

Asia *p-ropria* contain'd PHRYGIA *minor*, Mysia *minor*, Mysia *m-ajor*, ÆOLIS, IONIA, LYDIA, PHRYGIA *major*, CARIA, DORIS.

Asp = Phrygimin-MysimiM Æol Ioni-Lyd-phryma CarDo.

GALATIA comprehended PONTUS GALATICUS, PAPHLAGONIA, GALATIA *p-ropria*, Isauria, and Part of Pisidia, the other Part of which, with the Regions of Carbaſia, was contain'd in Pamphylia.

———— Gal = PongalaPaphGalap Is-pis.

SYRIA was divided into four Parts, SYRIA *p-ropria*, PHOENICIA, COELOSYRIA, PALESTINA.

PALESTINE was distinguish'd into GALILÆA, SAMARIA, JUDAEA, PERÆA or *Judæa* beyond Jordan, IDUMÆA.

SYR = SyrpPhœn-CœloPal. PAL = GálSamaJudæ-Per Idum.

TABLE XVI.

Antient GALLIA, GERMANIA, IBERIA, BRITANNIA.

1. GALLIA was divided by *Augustus* into four Parts or Provinces, viz. Gallia BELGICA, Gallia CELTICA or *Lugdunensis*, Gallia AQUITANICA, and Gallia NARBONENSIS. [Gall = BelCeltAquiNarb]

2. The

* Among the several Regions of Cappadocia was Lycaonia.

2. The Inhabitants of antient GERMANY were comprehended under four general Denominations, viz. INGÆVONES, VANDALI, ISTÆVONES, HERMI-ONES [GERM = Ing-Vand Ist-Her]

3. IBERIA, or antient Spain, was distinguish'd into three general Parts, viz. TARRACONENSIS, LUSITANICA, B-ÆTICA [IBERI = TarLuB]

4. BRITANNIA, according to the last Division by the Romans, was distinguish'd into five Parts, viz. VALENCIA, MAXIMA CÆSARIENSIS, BRITANNIA SECUNDA, FLAVIA CÆSARIENSIS, BRITANNIA PRIMA [BRIT = ValMax Britse-Fla Britprim]

GALL = BelCeltAquiNarb GERM = Ing-Vand Ist-Her I = TarLuB.

GEOGRAPHIA SACRA.

TABLE XX.

The Plantation of the Earth after the Flood.

And First, The several Countries mentioned in Holy Scripture, and denominated from some of the Posterity of *SHEM*, viz.

OPHIR, conjectured to be Part of the *East Indies*, viz. *Aurea Chersonesus* of the Antients [*Ophchers*]
Havilah,

94: MEMORIA TECHNICA.

HAVILAH, Part of *Susiana* and *Caramania* [*Havifus-car*]

ELAM, Part of *Susiana* and *Persis* [*Elaſus-pers*]

ASSHUR, or *Aſſyria* properly ſo call'd, into which *Nimrod* is ſaid to come and build *Nineveh*, &c. [*Aſhur*]

ARAM, Part of *Syria* and *Meſopotamia* [*Arámſy-mes*]

Land of *Uz*, *Judæa peræa*, and the adjoining Parts of *ARABIA deſerta* and *Petræa*. [*Uzjúp-arad*]

LUD, or *Lydia*, in *Aſia minor* [*Ludlyd*]

Ophchers *Havifus-car Elaſus-pers Arámſy-mes Aſhur*.
Uzjúp-arad Ludlyd —————

Countries mention'd in the Scripture, and denominated from the Poſterity of *JAPHET*, (eldeſt Son of *Noah*) whoſe Family is ſuppoſed to have peopled, beſides a conſiderable Part of *Aſia*, all *Europe*.

MADAI, call'd by Heathen Writers *Media* [*Mad*]

GOMER, thought to be *Albania*, on the *Euxine Sea* [*Gomeralb*]

TOGARMah, *Cappadocia* [*Togacap*]

ASHKENAZ, *Phrygia* [*Aſhkeph*]

TUBAL, *Iberia* in *Aſia* [*Tubiberi*]

MESHECH, the Country lying about the Montes *Moſchici*, between *Colchis* and *Armenia major*. [*Meſhéchmoſch*]

MAGOG, the Parts of *Scythia* adjoining to the Plantations of *Meſhech*, *Tubal* and *Gomer* [*Magſcythi-meſh*]

JAVAN, antient *Greece* [*Javgræe*]

ELISHAH, or the Iſles of *Eliſha*, the Iſles of the *Archipelago* [*Elíſharch*]

KITTIM underſtood of *Italy*, *Dan. xi. 30.* and of *Macedonia* in the Book of *Maccabees* [*Kittita*]

TARSHISH,

TARSHISH, by *Josephus* understood to be *Cilicia*, by others Old Spain, by others Carthage [*Tarshcil*]

Mad Gomeralb Togatap Afhkeph Tubibéri Mefhéch-mofch.

Magfeytbi-mefh Javgree Elífharch Kittita Tarshcil.

Countries mentioned in Scripture, denominated from the Posterity of *HAM* (youngest Son of *Noah*) whose Family peopled *Africa*, with the adjoining Parts of *Asia*.

Land of *CUSH*, (commonly render'd *Æthiopia*) under which Name seems to have been contain'd most of Arabia, distinguished into several Parts, denominated from the Posterity of *Cush*, as,

SHEBA, *Arabia Felix* [*Shebara-F*]

Havilah, Part of *Arabia deserta*, next to *Babylonia* [*Havara-d*]

RAamath and *DEDan*, Parts on the *Persian Gulf* [*Ra-dédpe-gu*]

MIZraim, or *Ægypt* [*MizrÆ*]

LUB or *Lybim*, that is, *Libya* properly so called [*Lub*]

PHUT, the more remote Parts of *Libya* largely taken [*Phutlib*]

Land of *CANAAN* lying between the River *Jordan* and the *Mediterranean* [*Cánajor-M*]

Land of *HAMATH*, North Part of *Phœnicia*, and adjoining Parts of *Syria propria* [*Hamáthphæn-S*]

ARvad, or *Arpad*, or the Isle *Aradus*, lying over-against *Hamath* [*Arvhama*]

Land of the *PHILISTINES*, *Palestine* proper [*Philpal*]

Cushæthiop [*Shebara-F Havara-d Ra-dédpe-gu*]
MizrÆ.

Lub Phutlib Cánajor-M Hamáthphæn-S Arvhama Philpal.

TABLE XXI.

Division of the Holy Land.

The Kingdom of *JUDAH* contained the Tribes of Judah and Benjamin [Ju-B]

The Kingdom of *ISRAEL* contained the Tribes of

A-sher, Nephtali, Zebulon, Issachar, Half of Manasseh, DAN, } West of Jordan
E-phraim, Simeon }

REUBEN, Gad, the other Half } East of Jordan
of Manasseh }

The seven Nations were the Canaanites, the Gergashites, the Hittites, the Hivites, the Amorites, the Jebusites, and the Perizzites.

ISR = A-NeZe -M IssMa -G Dan-E -Réub Si :
Ca-Girg-hit-hiv Am-Je-P.

The Division of the Holy Land in the New Testament, compar'd with the Divisions thereof among the Twelve Tribes in the Old Testament.

GALLILEE contain'd A-sher, Nephtali, Zabulon, and Issachar [GALL=A-NeZIss]

SAMARIA contain'd Ephraim, with the Half of Manasseh [SAM=ManEph]

JUDÆA contain'd DAN, Parts of Simeon and Judah with Benjamin [JU=Dán Si-Ju-B]

IDUMÆA contain'd the South Parts of Simeon and Judah, and some Part of the Land of Edom [ID=Si-JE]

PERÆA contain'd Reuben, Gad, and the other Half of Manasseh [PER=MGaR]

GALL=A-NeZIss. SAM=ManEph. JU=Dán Si-Ju-B. ID=Si-JE. PER=MGaR.

The

The Land of EDOM bordered on the South of *Judæa* [*EdómSjud*]

The Land of the MOABITES lay on the N. E. of *Edom* [*MóaNEd*]

The Land of the AMMONITES lay on the N. E. of *Moab* [*AmNEmoab*]

The ISHMAËLITES, MADIANITES, and AMALEKITES, liv'd promiscuouſly together, and therefore ſeem to be denoted by the common Name of the Mingled People, or *Arabians*, from *רע* *miscuit*, from whence the Greek Apellation of *Ἀραβ*, or *Ἀραβ*. [*Iſh-mad-amarab*]

EdómSjud MóaNEd AmNEmoab Iſh-mad-amarab.

TABLE XXII.

The moſt remarkable Rivers, with the Places where they riſe, and the Seas into which they fall.

IN EUROPE.

The *Volga*, the greateſt River in *Europe*, riſes in *Moscovy*, and falls into the *Caspian Sea* [*Volma-ca*]

The *DANUBE* riſes in *Swabia*, and falls into the *Euxine Sea* [*Danſwab-eux*]

The *RHINE* riſes in the Country of the *Griſons*, and falls into the *German Ocean* [*Rhingriſ-gerO*].

The *Vistula*, or *Keyſſel*, riſes in *Poland*, and falls into the *Baltick* [*Viſtpo-ba*]

The *NIEPER* riſes in *Poland*, and falls into the *Euxine Sea* [*NieP-eux*]

The *DWINA* riſes in *Moscovy*, and falls into the Gulf of the Northern Ocean, call'd the *White Sea* [*Dwinmo-ghi*]

98 MEMORIA TECHNICA.

The METRONICK Period was invented by *Meto*, in the Year before *Christ* 430, consisting of 19 Years [Metfiz-bou]

The CALIPPICK Period was invented by *Calippus*, in the Year before *Christ* 330, consisting of 76 Years [Calipitz-ois]

The DIONYSIAN Period was invented by *Dionysius Exiguus*, Ann. Dom. 527; consisting of 532 Years [Diolep-lid]

The JULIAN Period was invented by *Joseph Scaliger*, consisting of 7980 Years [Jdl-scalipouky]

The VULGAR Year of *Christ* was in the fourth of the INDICION, the tenth of the CYCLE of the SUN, the second of the CYCLE of the MOON.

Indic. erat quarto, decimo Sol. Luna secundo.

108 MEMORIA TECHNICA.

To find the Year of the Julian Period, the Years of the other Cycles being given.

Multiply the Cycle of the Sun into 4845 [Sol in skol']

—— The Cycle of the Moon into 4200 [Lunſag']

—— The INDICTION into 6916 [Indicſnas']

Divide the PRODUCT by 7980 [Div-prodoupouky']

The Remainder is the Year.

The Sunday Letters which begin every Month are generally known by the two *Engliſh* Verſes,

At Dover Dwells George Brown, &c.

But perhaps they may be more readily remember'd by the following Line, which lays the Reader under no Neceſſity of counting the Order of the Words, before he can tell which Month they answer to, every Month ending with the Letter which belongs to the first Day of it.

Ja Fd Mád Aprig Mayb June, Julg Aúe Seſ Oáe
Novéd Def.

MARCH, MAY, JULY, October, have Nones on the 7 Day, and the Ides on 15. [Mar-má-jul-oc = Nop-Idal] The rest (CAETERI) on the 5 and 13. [Cæt-l-at].

APRIL, JUNE, September and NOVEMBER have thirty (TRIGINTA) Days [Ap-jún-fe-no=trigint]

Mar-má-jul-oc = Nop-Idal Cæt-l-at: Ap-jún-fe-ng
= trigint.

In a Year (ANNO) are 365 Days, 8765 Hours, 525,949 Minutes, 31,556,937 Seconds.

AN = diſaul = Horeipaul = Minlel-non = Secta-lus-outoi.

The

The Motion of the Firmament, or fix'd Stars, is 50" in a Year, or a Degree in 72 Years. According to which rate the Motion (call'd the PLATONICK Year) is accomplished in 25,920 Years [An-Plato = dunez]

outoi.

PONDERA, NUMMI,
MENSURÆ.

S E C T. V.

*The Application of this Art to Coins,
Weights and Measures.*

THE Beginning of the Words is composed of the Initial Letters; thus At-ta stands for ARTTICK TALENT, HET for HEBREW T-alent; AD for A-ttick D-rachm; ALD for ALEXANDRIAN D-rachm; HETO for HEBREW Talent of Gold; (HET standing for HEBREW T-alent as before, and O for *Or*, or Gold) RoL for ROMAN L-ibra, Den for DENARIUS, Shek for SHEKEL, GreF for GRECIAN F-oot, HeC for HEBREW C-ubit, RoFq for ROMAN F-oot Square, &c.

The *Italick* Endings of the Words represent the Number of Pounds, Shillings and Pence, which are separated from each other by *Hyphens*, or else signified by the *Roman* Letters l. s. d. The double Lines denote Equality. Thus AM = drag = t-ei-n, signifies that an A-ttick M-ina, which is equal to 100 Drachms, was 3 Pounds 8 Shillings and 9 Pence. The Letters, though separated, are to be pronounced together;

Pondera, Nummi, Mensuræ. III

ther; as *t-ei-n tein*. The Reader is to be reminded here that *re* signifies $\frac{1}{2}$, *ro* $\frac{1}{4}$, &c. according to the general Rule, pag. 5. But *Note*, that instead of the Fraction *re*, the Letter *h* is sometimes used for Half, as *oikbe-h* = 7812 $\frac{1}{2}$ *sc.* 7812 Pounds 10 Shillings.

GRECIAN

* In reducing the *Jewish* Measures, I have follow'd Bi-
shop Cumberland, who makes the Cubit = 21,888 Inches.
Dr. Arbuthnot thinks it plain that there were two Sorts of
Cubits, the Sacred One, and the profane or Common One;
the former exceeding the latter by a Hand's-Breadth or three
Inches. The Profane Cubit he makes equal to 17,82
Inches; the Sacred One = 20,79 Inches.

* So Bishop *Cumberland* from the Rabbinical Accounts. But Bishop *Hooper*, from *Philo* and *Josephus*, makes it equal to the Attick *Stater* or *Tetradrachm* = 68, 4 * 4, or 67 * 4 Grains.

† According to the Weight of the Standard Mina of *Solon*. Bishop *Hooper* supposes, that whilst the Money Drachm fell gradually from 68, 4 to 62, 57 Grains, the Ponderal Drachm continued still the same, which I have therefore here retain'd. Dr. *Bernard* lays the middle Sort of Attick Drachms at 66 Grains, which (Table I.) are accordingly valued at 8 *d* $\frac{1}{4}$. But the Weight of the Attick Drachm, under the first *Roman* Emperors, and for some considerable Time before, was about 62, 57 Grains; and upon this Drachm, and the Equality of it with the *Roman* Denarius, most of the Computations in *Classick* Authors are founded.

‡ The Common Attick Mina was supposed equal to 12 $\frac{1}{2}$ *Roman* Ounces. The Mina Medica was 16 *Roman* Ounces, and exactly the Weight of our *Averdupois* Pound.

Decimal

Decimal Tables for the more easy Reduction of ancient Coins, Weights and Measures.

Those who understand Decimal Arithmetick will, I hope, excuse me, if for the Sake of such as are unacquainted with it, I lay down two or three Observations, in order to make the following Tables more generally useful ;

First, That the Denominator of every Decimal Fraction is an Unit, with as many Cyphers as there are Places of Numbers in the Fraction ; thus ,5 signifies $\frac{5}{10}$, 05 signifies $\frac{5}{100}$, 005 signifies $\frac{5}{1000}$, &c.

Secondly, That the nine Figures at the left Hand of each of the Tables may stand either for Units, or, by the supposed Addition of one, two, three, or more Cyphers, for Tens, Hundreds, Thousands, &c.

Thirdly, That if the said nine Figures are supposed to stand for one, two, three, four, &c. then the Decimals stand as in the Table : If for ten, twenty, thirty, forty, &c. or for one Hundred, two Hundred, &c. then for every such supposed Addition of a Cypher, one Figure in the Place of Decimals is to be added to the Place of Integers.

Thus, a *Jewish* Cubit is equal to 1 *English* Foot, and 824 Thousandth Parts of a Foot.

		<i>Feet decim.</i>
1 Cubit	=	1 ,824
10 Cubits	=	18 ,24
100 Cubits	=	182 ,4
1000 Cubits	=	1824

If there are not Places enough of Decimals to answer, they must be supplied with Cyphers :

		<i>lib. decim.</i>
Thus, 1 Attick Talent	=	206 ,25
10 Attick Talents	=	2062 ,5
		100 At-

134 MEMORIA TECHNICA.

100 Attick Talents = 20625
 1000 Attick Talents = 206250 &c.

But as the common Computation in Claffick Authors is by Sesterces and Drachms, I shall exemplifie more particularly the foregoing Observations in the two Tables drawn up for them.

SESTERCE = 1*d.* 3*f.* $\frac{3}{4}$
 in Decimal Fractions
 of a Pound Sterling
 = ,00807291667
 [Sest = *zykypenaffoi*]

A-ttick D-rachm, or
 Roman Denarius,
 = 7*d* 3*f.* in Deci-
 mal Fractions of a
 Pound Sterling
 = ,032291667
 [Ad = *zidenaffoi*]

1 Sesterlus.	
	Decem Sesteril or Nummi.
	Centum Sesteril.
	Sesterium or 100 Sesteril.
	Decem Sesteria or 1000 HS.
	Centum Sesteria or 10000 HS.
	Decies Sesterium or 1 Million HS.
	Centies Sesterium or 10 Millions HS.
	Millies Sesterium or 100 Millions HS.
	Decies Millies or 1000 Millions HS.
	Centies Millies or 10000 Millions HS.
	Millies Millies or 100000 Millions HS.
1	,00807291667
2	,01614583333
3	,02421875000
4	,03229166667
5	,04036458333
6	,04843750000
7	,05651041667
8	,06458333333
9	,07265625000

1 Drachm.	
	10 Drachms.
	100 Drachms or 1 Mina.
	1000 Drachms or 10 Minz.
	1 Myriad (= 10000 Dr.) or 100 Minz.
	10 Myriads (= 100000 Dr.) or 1000 Minz.
	100 Myriads (= 1 Million Dr.) or 10000 Minz.
	1000 Myriads (= 10 Mill. Dr.) or 100000 Minz.
	10000 Myriads of Drachms, or Myr. of Myriads.
	10 Myriads of Myriads of Drachms.
1	,032291667
2	,064583333
3	,096875000
4	,129166667
5	,161458333
6	,193750000
7	,226041667
8	,258333333
9	,290625000

According

Pondera, Nummi, Mensura. 135

According to the Observations before laid down, it is evident that

	<i>lib.</i>
1 Sestertium, or 1000 HS.	= 008 ,07291667
2 Sestertia, or 2000 HS.	= 016 ,14583333
3 Sestertia, or 3000 HS.	= 024 ,21875

And so down to 9 Sestertia; the three first Figures of the Table being Integers, the rest Decimals. So,

	<i>lib.</i>
*Decies Sestertium, or 1 Mill. HS.	= 8072 ,91667
Vicies, or 2 Million HS.	= 16145 ,83333
Tricies, or 3 Million HS.	= 24218 ,75 &c.

Hence it appears, that the Value of most of the Sums mentioned in Classick Authors may be discover'd from the Tables at first Sight; the rest by the Help only of Addition. Thus,

What is the Value of the Centies Quinquagies HS?

	<i>lib. decim.</i>
Centies HS.	= 80729 ,1667
Quinquagies	= 40364 ,5833
Centies Quinquagies	= <u>121093 ,75</u>

What is the Value of 375 Attick Drachms?

300 Drachms	= 9 ,6875
70 Drachms	= 2 ,26041667
5 Drachms	= 0 ,16145833
375 Drachms	= <u>12 ,109375</u>

What

* With the numeral Adverb *Centena. Milla.* is always understood.

136 MEMORIA TECHNICA.

What is the Value of 51 Myriads of Drachms?

50 Myriads	=	16145 ,83333
1 Myriad	=	322 ,91667
51 Myriads	=	16468 ,75

Note. That the Table for Drachms or Denarii, will also serve for Minæ and for *Asses*, remembering that a Denarius is equal to 10 Asses, and a Mina to 100 Drachms. Thus,

		<i>lib. decem.</i>
Æris (sc. Assium) Millia X = 1000	}	
Denarii =		32 ,291667
Æris Millia XXV = 2500 Denarii		= 80 ,72916
Æris Millia LXXV = 7500 Denarii		= 242 ,1875

I beg the Reader's Pardon if I have been too particular, but was willing to have the Tables perfectly understood: what has been already said will easily be applied to those which follow.

*Attick Drachm * Attick Talent † Attick Talent

The

142 MEMORIA TECHNICA.

The DIAMETER multiplied by 3,1416 gives the PERIPHERY [Diperi, *bobs* dat priph] Consequently the Periphery divided by 3,1416 gives the DIAMETER.

The AREA of a Circle is given by multiplying the SQUARE of the DIAMETER into 0,7854.

Datur Area SquaD per *y,peilo*.

The AREA likewise is given by multiplying the fourth Part of the DIAMETER into the PERIPHERY.
[Ar = $\frac{\text{radi} \times \text{pe}}{4}$]

The AREA of an ELLIPSIS is given by multiplying the RECTANGLE of the TRANSVERSE and CONJUGATE DIAMETERS into 0,7854.

Area fit Ellips. Dia-tran-con duct. in *y,peilo*.

The SURFACE of a SPHERE is given by multiplying the PERIPHERY into the DIAMETER [Surf = $\text{pe} \times \text{D}$]

The SURFACE of a SPHERE is also given by multiplying the AREA of its largest Circle into 4.
[Surf = $\text{are} \times 4$]

The SOLIDITY of a SPHERE is given by multiplying $\frac{1}{6}$ of the RADIUS into the SURFACE. [Sol-sphe = $\frac{\text{rad} \times \text{sur}}{6}$]

The Memorial Lines.

The

The Quantity of Vapours raised out of the Sea, estimated by Dr. Halley. Vide Miscel. Curios. Vol. I.

The MEDITERRANEAN, supposed to be equal to 160 Square DEGREES, is computed to yield in Vapour *per Diem* 5280 Millions of T-ons [Med = dégbaurz = lékymilt]

The THAMES is computed to carry down in a Day, *sc.* 24 Hours, into the Sea 20,300,000 TONS [Tham = ex-igtbtton]

The Rivers (FLUVII) which run into the MEDITERRANEAN are computed to carry 1827.000,000 TONS, which is little more than $\frac{1}{3}$ of what is raised in Vapour [Fluv-med = aképmilt]

The Computations are made thus:

By Experiment it appears, that each SQUARE FOOT of the Surface of Water yields in Vapour *per Diem* HALF a PINT [Squaf = ha-pin]

Each Space of four Foot Square (= 16 SQUARE Feet) yields a GALLON [asquaf = gal]

A MILE SQUARE 6914 TONS [Mil/snafton]

A Square DEGREE (of 69 English Miles) 33.000,000 Tons [Dég (misou) timton]

The MEDITERRANEAN = 160 Degrees = 5280.000,000 Tons as above.

Squaf = ha-pin asquaf = gal Mil = snafton Dég (misou) timton.

The Quantity of Water the Mediterranean receives from the Rivers that fall into it, is estimated thus:

The most considerable Rivers that run into the Mediterranean are the Ebro, the Rhone, the Tiber,

MEMORIA TECHNICA.

the PO, the NILE, the DON or *Tanais*, the RHESTER, the NIEPER or *Borysthenes*. Each of these is supposed to carry down ten Times as much Water as the *Thames*: Not that any of them is so great, but so to allow for the small Rivers that run into that Sea. Now the Water of the THAMES being computed at about 20.300,000 Tons as above, the nine Rivers aforesaid each will amount to 203.000,000; in all 1827.000,000 T-ons.

Thám=*ex-igtht* Ib-rho-ti-po Nil-don Niest-nieper-akepmilt.

The Water of the Thames is computed thus:

'Tis supposed to run at *Kingston Bridge*, where the Tide reaches not, at the rate of two Miles an Hour, which is 48 Miles in 24 Hours; 48 Miles are equal to 84,480 Yards. [*Misk*=*Yako-feiz*] which being multiplied by 300 Yards, (the Profile of Water at *Kingston Bridge*, where 'tis supposed to be 100 Yards broad and 3 deep) produces 25.344,000 Cubick Y-ards of Water [*Yako-feiz* per *ig*=*Yél-tfoth*] which are equal to 20.300,000 TONS [= *ex-igthton*]

Misk=*Yáko-feiz* (Kin-prig) *Yako-feiz* per *ig*=*Yél-tfoth* = *ex-igthton*.

The Velocity of Sound, Light, &c.

A Cannon Bullet. (GLOBUS tormento bellico emissus) in a Second, moves 204 YARDS [*In-sec Glob-yarezo*]

Light (Lumen) in a Second moves 200,000 MILES [*Lu-milegth*]

Sound (Sonus) moves in a Second 1142 Feet (PEDES) [*Son-ped-movetabfe*]

A Cannon Bullet moves a M-ile in 17 HALF SE-conds [*Glob-M-ápha-féc*]

Sound

MISCELLANEA. 145

Sound moves a Mile in 9 half Seconds $\frac{1}{4}$. [Sonn,ro]

A Cannon Bullet would be in moving to the Sun (Ad Solem) 32 Years $\frac{1}{2}$. [Ad-fol-glob = *ân-te, re*]

Sound would be in moving to the Sun 17 Years. [Sonap]

The Descent of heavy Bodies [DESCENSUS GRAVIVM) is 16 Feet $\frac{1}{17}$, or an Inch, in a Second [Def-gravi-sec = *fas, rad*] And in more Seconds as the Squares of those Times.

A PENDULUM of 39 Inches, 2 Tenths (Pendulum Intou, d) Oscillates or Vibrates Seconds. [Oscil-sec Pendulum Intou, d]

Note. That the *Athenians* began their Year from the New Moon, whose Full was next after the Summer Solstice, which was at first reckon'd to be upon the 8th of *July*, after on the 27th of *June*.
Vid. Bev. Chron. Instit. Lib. I. Cap. 12.

Jewish and Christian Æra of the Creation.

Both *Jewish* and *Christian* Writers make Use of the Æra of the Creation of the World; but there is great Variety of Opinions concerning the Number of Years between that and the Birth of *Christ*. That which is most generally received is, that the first Year of the *Vulgar Christian Æra* commences from the Day of his Circumcision, viz. the First of *January* in the Year of the World 4004, and of the
Julian

MISCELLANEA. 147

Julian Period 4714. The *Jews* place the Creation of the World *later* by about 243 Years, and the *Greek* Historians, upon the Authority of the *Septuagint*, *sooner* by about 1490 or 1500 Years, so that

Oct. 7.	} of the First Year of the Christian Æra	} began	{ the 3762 Year of the Jewish Æra the 5494 of the Greek Ecclesiastical Æra the 5509 of the Greek CIVIL Æra.

The Quinquarticular Controversy, concerning,

1. PREDESTINATION. 2. Free-Will (LIBERUM Arbitrium.) 3. The Force of divine Assistance (AUXILIUM.) 4. PERSEVERANCE. 5. The Extent of REDEMPTION.

The *Calvinian* Doctrine upon these Points, handed from *Geneva* by the *English* Refugees, and propagated by CARTWRIGHT in the *Margaret* Professor's Chair at *Cambridge*, was at a Consultation of several Prelates and Divines at *Lambeth* digested into nine Articles, commonly called the LAMBETH ARTICLES, and agreed upon N-ov. 10. 1595. [*Naz-aboul*] but by Order of Queen *Elizabeth* were immediately recall'd and suppress'd.

Lamb-Art = Cart Naz-aboul Predés-Liber-Auxili-Pers-Red.

The seven Precepts of the Sons of Noah are recorded by the Jewish Doctors under the following Titles.

I. To worship the true God. [CULTUS *divinus*]

II. To renounce IDOLATRY.

III. To commit no Murder. [CAEDes]

IV. No

MISCELLANEA. 153

IV. Not to be defiled with Fornication, &c. [STUPRUM]

V. To avoid all Rapine, Theft, &c. [FURTUM]

VI. To administer Justice [JUSTITIA]

VII. Not to eat the Flesh with the Blood [SANGUIS]

Such Gentiles as were admitted to the Worship of the God of *Israel*, and the Hope of a Future Life, but were not circumcised, nor yet conformed to the Mosaical Rites, being only oblig'd to the Observation of the foregoing Precepts were call'd Proselytes of the Gates, in Opposition to the Proselytes of Righteousness, or of the Covenant, who differ'd nothing from the *Jews*, but that they were of *Gentile Race*. *Vid. Lewis Heb. Antiq.*

Sept-Præcept = Cul-Idol-Cæd-Stup-Furt-Jústiti-Sanguis.

MISNAH, GEMARAH, TALMUD.

The MISNAH in 6 B-ooks [Misna-Bs] contained 63 Tracts [Traut] into which the Traditions or Oral Law of the *Jews* were methodically digested by Rabbi *Judah HAKKADOsh* in the Time of ANTONINUS P-ius [Hakad-AnP] As soon as it was published, it became the Subject of the Study of all their learned Men, and the chiefest of them both in *Judæa* and *Babylonia* employed themselves to make Comments upon it; and these with the *Misnah* make up both their *Talmuds*, i. e. the *Jerusalem Talmud*, and the *Babylonish Talmud*. These Comments are called the GEMARAH or Complement, the Misnah the Text; both together the TALMUD [Tal = Mis-Gema] The JERUSALEM TALMUD was compleated about A. D. 300. [Tál-Jerig]

154 MEMORIA TECHNICA.

T H E
U_SE of the I N D E X.

THE following Index may be useful in two Respects; either as it will serve to try the Proficiency of the Learner, who may exercise himself in Resolving and Explaining the Memorial Words, thus separated from their proper Classes, and intermingled with each other; (which will at the same Time be a Means to fix them the better in his Memory:) or, as it may be to those who are a little acquainted with the Art, but have not charged their Memories with the Technical Lines, a ready Help to answer many Questions in Chronology, Geography, History, &c. without the Trouble of searching for them in the Tables. To make which the easier in the Historical and Chronological Part, it was thought proper to add a Letter or two, at the End of each Word; by the Help of which, and the Beginning of the Words together, any one, who is but tolerably acquainted with History, and is Master of the General Key, will readily know what the Words stand for. The Abbreviations are as follow.

The Use of the INDEX.

A B. Archbishop of <i>Canterbury</i> .	K Eg. King of <i>Egypt</i> .
Æt. <i>Æra</i> or <i>Epocha</i> .	K Ju. King of <i>Judah</i> .
B. Battle.	K Is. King of <i>Israel</i> .
C. Council.	K M. King of <i>Media</i> .
Ep. Epistle, <i>i. e.</i> the Time of Writing it.	K Ma. King of <i>Macedon</i> .
Ev. Evangelist.	K P. King of <i>Persia</i> .
E R Emperor of <i>Rome</i> .	K R. King of <i>Rome</i> .
E E Emp. of the East.	K S. King of <i>Syria</i> .
E W. Emp. of the West.	L. Learned Man, Author, &c.
F. Father.	Leg. Legate.
H. Heretick, Schismatic, &c.	Mart. Martyr.
H P. High Priest.	P. Pope.
J. Judge of <i>Israel</i> .	Pa. Patriarch.
K. King.	Po. Poet.
K Aff. King of <i>Affyria</i> .	Pr. Prophet.
K B. King of <i>Babylon</i> .	Q. Queen.
K E. King of <i>England</i> .	W. War.
	= different Names of the same Person.

Those Words which have no Letter at the End of them, denote some Fact in History; as Abaneth the Calling of Abraham.

The Italic Letters represent the Year before or after Christ. The Small Capitals M and P in the middle of a Word denote the Year of the World, or of the Julian Period, as Troypita, &c.

Be careful to give the right Pronunciation; and note, that the Accent, unless where otherwise marked, or when the Penultima is long by Position, is always on the Ante-penultima.

THE

The Construction and Use of the GEOGRAPHICAL WORDS.

 *F* Words consisting of two Parts in the same Character, joyn'd with an Hyphen, the first Part denotes a City, Town, &c. in a Kingdom, Region, or Province denoted by the latter: The Words in Italic Letters signifying Places in Antient Geography; the Words in Roman Letters Places in Modern Geography. Thus *Abdér-thra*. *Abdera* a Town in ancient Thrace. *Aginc-art*. *Agincourt* in Artois.

Words in a Parenthesis denote that the Place represented by the first Syllable, or Syllables, is one of those represented by the latter, as (*Anteg-lee*) *Antego* one of the *Leeward Islands*, (*Cub-ant*) *Cuba* one of the *Antilles*.

The Letters *N. E. S. W.* following a Word denote the Situation of a Place; as *Antill-luc S.* the *Antille Islands*, South of the *Lucay Isles*; *Madér-barb W.* *Madera Isles*, West of *Barbary*.

The Letters *G S.* denote *Sacred Geography*.

Italicks joyned with an Hyphen denote the Latitude and Longitude of a Place; as *Agrék-oit* the Latitude of *Agra* 28 Deg. the Longitude 73.

Italicks joyn'd with a Comma denote the Proportion of the Kingdom, &c. to Great Britain, as *Germt,ut.* Germany to Great Britain as 3,53 to 1.

Italicks joyned without an Hyphen denote the Distance from London or Jerusalem; as *Pardel sc.* Paris from London about 225 Miles. *Antiochig*, *Antioch* from Jerusalem about 300 Miles.

Syllables joyned with this Mark = denote correspondent Places of Antient and Present Geography; as *Ach = Livad*, the antient *Achaia* the present *Livadia*.

F I N I S.

BOOKS sold by C. KING in Westminster-Hall.

A System of *English Ecclesiastical Law*. Extracted from the *Codex Juris Ecclesiastici Anglicani* of the Right Reverend the Lord Bishop of *London*; for the Use of young Students in the Universities, who are designed for Holy Orders. By *Richard Grey, D. D.* Rector of *Hinton* in *Northamptonshire*. The Second Edition.

Of Visitations Parochial and General: Being the Charges deliver'd to the Clergy of the Archdeaconry of *Surrey*, by *Edmund Gibson, D. D.* late Archdeacon of *Surrey*, and now Bishop of *London*. To which are added, some other Tracts relating to the Government and Discipline of the Church of *England*.

The Chevalier *D'Arvieux's Travels* in *Arabia* the Desert. Written by himself, and published by *M. de la Roque*. Done into *English* by an eminent Hand. Illustrated with Copper Plates.
